Tankers 1: Types

Get ready!

- Before you read the passage, talk about these questions.
 - 1 What are the different types of crude tankers?
 - What materials might be carried in a tanker other than crude oil?

Reading

- 2 Read the information from a ship manufacturer. Then, choose the correct answers.
 - 1 What is the main purpose of this document?
 - A to discuss pros and cons of different tankers
 - B to explain the manufacturing process
 - C to describe the uses of different tankers
 - D to illustrate the improvements to tanker design over time
 - 2 Which of the following is used to carry crude oil?
 - A a liquefied gas tanker
 - B a Suezmax
 - C a chemical tanker
 - D a product tanker
 - 3 Which of the following tankers can carry multiple types of materials?
 - A LPG
- C Product tanker
- B LNG
- D OBO carrier

BRYANT & SONS SHIP MANUFACTURERS

HIGH-QUALITY MERCHANT NAVY PROVIDERS SINCE 1959

What do we offer?

Bryant & Sons manufactures a wide range of tankers and vessels. We classify our ships by the type of cargo they carry. You can also request a ship with a specific deadweight tonnage (DWT), if necessary.

Crude tankers are our most popular products. We offer many sizes; always consult us about sizes before placing an order. We offer standard Panamax, Aframax, and Suezmax tankers. We also manufacture VLCCs and ULCCs for oversized cargo loads.

Specialized tankers are available for cargo other than **crude** oil:

- Product tankers for refined petroleum products
- Chemical tankers for petrochemicals, clean petroleum, etc.
- Liquefied gas tankers for LPG (liquefied petroleum gas) or LNG (liquefied natural gas)

OBO (Ore/Bulk/Oil) carriers that can transport both liquid and solid materials

Vocabulary

3 Fill in the blanks with the correct words and phrases from the word bank.

V	rde			
	tanker	Panamax	VLCC	crude
	LPG	product tanke	r OBC	carrier
1		ompany wanted a		

dangerous vapor called _______

4 An Aframax and a Suezmax are both examples of a(n) ______.

3 The tanker was transporting a potentially

5	A(n)	can carry	more tha	n
	200,000 tons of oil.			

6	The	was carrying refined
	petroleum to the	e next port.

7	The most	common	product	moved	by	tankers
	is		·			

Read the sentence pairs. Choose which word or phrase best fits each blank. 1 DWT / Aframax A A(n) can't carry as much oil as a VLCC.	Speaking 8 With a partner, act out the roles below based on Task 7 Then switch roles.
B The manager measured to determine	USE LANGUAGE SUCH AS:
which ship was the biggest in the fleet.	Can we talk about
	We don't have
2 Suezmax / chemical tanker	Maybe we could
A A carries the same substance as a VLCC.	Waybe we could
B A cannot safely carry crude.	
3 crude tanker / LNG	Student A: You are a manager
A is not in its natural state.	at a shipping company. Talk to
B A is a category that covers many ships.	Student B about:
	new tankers
4 ULCC / liquefied gas tanker	products you do and do not
A The captain chose a because he needed to carry more than 300,000 tons of oil.	carry
B A is not as large or as common as a	 the type of tanker you recommend
crude tanker.	Toodininona
